

MANUAL FOR GHANET INFORMATION MANGEMENT SYSTEM (GIMS)

The GHANET INFORMATION MANGEMENT SYSTEM (GIMS) is meant to facilitate seamless data collection and analysis concerning the Rollout of the HIV Self-Testing (HIVST) project.

This manual is designed to guide users through seamless installation of the GIMS application, ensuring a smooth and trouble-free process. To facilitate a common approach of installing the application, the "App Tester" approach would be used for all instances.

Please note that this application is currently available only for Android.

NEW USERS

This section is for new users (IPs and Volunteers) who have not yet signed up for access to the software. This approach involves installing the GIMS application through the "App Tester Application".

STEP 1

Click on link provided below:

https://appdistribution.firebase.dev/i/390deba881a89abf

STEP 2

The link directs you to the page below, where you will need to enter an active email address and then tap on "Sign Up" as shown below.

Firebase App Distribution	
	Ready to test this app?
	GHIVST
	Sign up to share your email address with the developer and get access:
	Email
	Sign up

STEP 3

After submitting your email, please check the inbox of the address you provided. You will receive an email with a button (hyperlink) that will take you directly to the app tester platform where GIMS is hosted.

Get the Firebase App Tester app to easily access all of your test apps and releases.
Download App Tester

<u>STEP 6</u>

This step is conditional if you have not allowed your device to install applications from third-party sites. If after tapping on the downloaded "apk" you do not see this popup shown below kindly skip to **Step 7.**

If you saw the popup above follow these steps to install:

• Tap on the "Settings" option

• This will take you to your settings where you can allow third-parties applications to install on your device. When opened as show below tap on the greyed-out icon to enable it. The icon turning blue signifies that it has been enabled.

\leftarrow	· Install Unknown Apps
	File Manager 3.3.0.080
A	llow from this source
(i)	Installing apps from unofficial sources may increase the risks of your phone and personal data being attacked.

<u>STEP 7</u>

- A popup would appear prompting you to install the application.
- Tap on "Install" as shown below to install the app tester.
- The installation process would start and prompt you when done.

Do you want to install this	s app?	App Tester Installing
Cancel	Install	Cancel

• Click on "Open" when installation is done as shown below.

- "App Tester" would be opened as displayed on the right.
- Tap on "Sign in with Google" NB: a popup would come with a list of emails you have logged into on your device. Select the same email you used to Sign Up earlier to gain access.
- After the selection of the mail, you would be taken to the page shown below where you tap on GHIVST to access the "App Tester".

Test apps

GHIVST com.ghanet.app 6 releases

- Tap on the checkbox option to consent to the terms and conditions.
- Tap on "START TESTING ON THIS DEVICE" to proceed.
- This will take you to the "App Tester" application's dashboard as show below.
 NB: The App Tester application would be where all software version updates will be uploaded to.

Always check the application for latest updates concerning the software from the application. The latest version of the GIMS application is "0.0.14 (14)" and recent updates will always be at the top.

• Click on the download button to download the GIMS software.

• You would receive a prompt of the download as shown below.

OLD USERS – INSTALLING APP TESTER

This approach is to help IPs and Volunteers who have already signed up for access through mail. This approach involves installing the GIMS application through the App Tester Application.

STEP 1

- Access the mail you received when you first signed up for access to the GIMS software as shown on the right corner.
- Tap on "Install Firebase App Tester" hyperlink to start the installation process of the application as on the right corner.
- Tap on the "Download App Tester" button to download the application as shown below.

Test apps

- After clicking "Download," a notification will appear on your phone, alerting you that the download has started.
- Once the download is complete, navigate to your Downloads folder or return to your notifications and tap on the downloaded app to open it named "app-tester.apk" as shown at the right corner.

<u>STEP 2</u>

This step is conditional if you have not allowed your device to install applications from third-party sites. If after you have tapped on the downloaded "apk" you do not see this popup shown below kindly skip to **Step 3.**

If you saw the popup above follow these steps to install:

• Tap on the "Settings" option

• This will take you to your settings where you can allow third-parties applications to install on your device. When opened as show below tap on the greyed-out icon to enable it. The icon turning blue signifies that it has been enabled.

<u>STEP 3</u>

- A popup would appear prompting you to install the application.
- Tap on "Install" as shown below to install the "App Tester".
- The installation process would start and prompt you when done.

LOGGING INTO THE GIMS PLATFORM

This section is applicable when you have updated or installed the latest version of the GIMS application. Follow these processes to login:

• Launch the GIMS application as shown below.

- Enter your phone number specifically phone number that was submitted to Secretariat to be used as your username.
- Enter Default password: **GHANET@456**
- Tap on "LOGIN" to log into the application.
 NB: The default password is a general code for all users. You need to change your password after you log in to have exclusive access to your account.

• You would be taken to a page to change your password as shown below.

- Enter the default password into the Old Password field indicated.
- Enter your discrete new password in the "New Password and Confirm Password" field. NB: Kindly make sure that your password word matches.
- With all data fields entered tap on "SET PASSWORD" to reset password.
- You will be redirected to the login page as shown below.

GHANET Information Management System (GIMS)
